

# CRYPTFILLCOIN ICO PRESENTATION

Overview of CryptFillCoin Platform

# Summary

- CryptFillCoin has been conceived and designed to bring the cheapest way to send, receive and store the most popular and favorite cryptocurrencies. We will be offering individuals and companies the ability to create invoices, send and receive payments, multi-currency wallets. As the project grows and expands we look forward to adding more features to open more avenues and appeal to more markets to facilitate converting more fiat currencies into cryptocurrencies.

# What is CryptFillCoin?

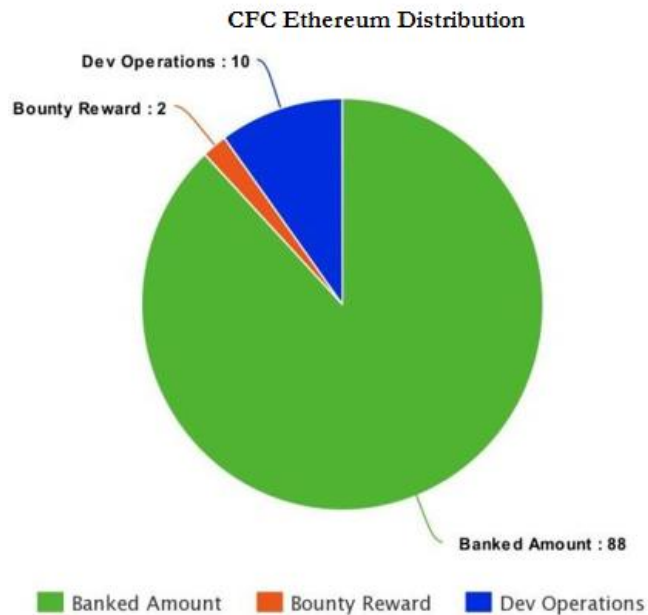

- CryptFillCoin is a cryptocurrency founded on the idea that users should be rewarded for the platform they choose.
- CryptFillCoin's main goal in all of this is to open the commerce market to cryptocurrency. Having an easy way for business to exchange fiat currencies with cryptocurrencies of individuals and vice versa is virtually rare, and with our team and experience we believe we can accomplish this effectively and securely.
- Our main goal is to create an environment of trust, and safe operations for all users.

# George Nuamah – CEO and Founder

- George has a long background in computer programming with a degree in computer science.
- He has led many projects and has a passion for software programming and design.
- Created many desktop and web based applications.
- Experience has led to a great understanding of the lot

# CryptFillCoin(CFC) Token

- During presale and the ICO, purchases can receive extra tokens up to a certain limit. We are setting a cap of 2 million tokens to be sold during the presale. During this time, all purchases will be given 30% more tokens. Once the ICO starts, the bonus structure will change to the following:
- Phase 1 of the ICO will offer 20% more tokens on purchases on the first 3 million tokens. This is outside of the tokens sold during the presale.
- Phase 2 of the ICO will offer 10% more tokens on purchases on the next 5 million tokens.
- Phase 3 of the ICO will offer no bonus tokens
- Pricing structure will work as follows:
- Pre-sale each CFC token will cost \$0.20
- Phase 1 each CFC token will cost \$0.24
- Phase 2 each CFC token will cost \$0.28
- Phase 3 each CFC token will cost \$0.32
- The pre-sale is when you have the best deal as \$100 USD will get you 500 CFC Tokens and 30% more totaling 650 tokens.

# Insure-Via-Net

# Insurance

- Should for whatever reason your monies get stolen, have fraudulent activity on an account, misroute money, or any other number of reasons we will recover it. As long as this event occurs on the CryptFillCoin system and terms.
- We of course will take every step possible to prevent this, but have the peace of mind that you are safe with us no matter what.

# The Crypto Economy

- We know and understand the volatility of the crypto markets. We've all seen the pump and dumps, the crazy drops and inexplicable growth, but how do you combat these?
- Our system is designed to not target a single market or currency. We've been developing our system to spread our transactions not only over exchanges, but also over currencies as to not target one specific coin.

# Can we buy from CryptFillCoin?

- Eventually yes. Our first and foremost priority is to establish a user base built on trust and confidence.
- To support this user base in a way we feel is fair we must first establish enough Bitcoin and Ethereum to not only diversify the coins offered, but be as responsive and immediate as our customers will have come to expect.

# Is this For Real?

- “Dude, there’s no way this is real. I mean it’s obviously too good to be true, and there’s no way they can do it for real.”
- “What’s the catch?”
- Well, it is real. Don’t get left out in this opportunity for financial freedom.
- The most successful businesses over the last decade have all been digital businesses.

# Do you store the currency?

- Our team at CryptFillCoin is trying to make cryptocurrencies easily accessible to the mainstream public. By acting like a bank we're trying to bring tried and true methods to the crypto world like 0 fee storage, free transfers, interest gained on assets, and complete security all while ensuring access to funds
- With a multi-server cold wallet system, we feel we can offer the best protection to users' funds, as well as ensure a truly fee free service.

# Multi-Server Cold Wallet System

- Members of the CryptFillCoin team spin up new servers daily, to allow a new and completely different location for users' cold wallets to be stored.
- This has a lot of proprietary knowledge and without going into too much detail think of a nuclear launch codes, good for one day and destroyed never to be used again.

Thank you

We look forward to serving you.
